Kids will have a ball at the Junction Jamboree Indoor Playground! This play set comes with several various activities for everyone to enjoy. Exercise your strength and agility by climbing up the four-level deck climber. This will take you to one of the two junction cubes where you can decide where to go next! Will you continue through the five-foot crawl tunnel or will you get a thrill going down the 6'-8" curved tube slide? The tunnel will lead you to either a turbo car with a steering wheel to imagine and play pretend or a t-tube bubble window lookout to check out the scenery. Once you come down the slide, the fun does not end there! Children can build cognitive and sensory skills by playing on this assortment of activity panels: gyro, ball turn, and tic-tac-toe activity panels. When it's time to go, grab your sneakers and other belongings from the convenient sneaker keeper. The Junction Jamboree play area will keep kids busy for hours! Please note: Surfacing tiles and ramps are not included.
